### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4, line 6 is unclear. Line 6 recites a "detachable connection such that said front wall cannot separate from said back wall". It is unclear to claim a detachable connection that cannot be separated.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hill (USPN 5,813,696).

Hill discloses an airbag that has a front wall facing an occupant to be restrained, a back wall, and a side wall, and the front wall being detachably connected to the back wall by element 60, 70. The connection between the front wall and the back wall is "severed" by the unfolding of the side wall when the airbag is inflated. Hill shows the side wall portion of the airbag is unfolded before the inflation of the central portion of the airbag due to the restraining element 60.

The unfolding of the sides of Hill which is essential to and initiates the severing of the connection between the front wall and back wall of the airbag. Applicant does not claim any structure not present in Hill and therefore Hill meets all the structural limitations of the claims.

***Allowable Subject Matter***

Claims 3 and 5 are allowed.

Prior Art does not show an airbag with a front wall connected to a back wall wherein the connection is formed by at least one loop on the front and back wall respectively and further having a separate latching element to connect the loops, nor does Prior Art show the latching element as a traction cable attached at one end to a side wall of the airbag.

***Response to Arguments***

With respect to Applicant's argument that in Hill (USPN 5,813,696), the connection between the front wall and the back wall is not severed by unfolding the side walls, Examiner disagrees. Hill discloses an airbag that has unfolding sides which are essential to and initiate the severing of the connection between the front wall and back wall of an airbag. There is no structural difference between Hill and Applicant's claims 1 and 4.

When the applicant claims an operation of a device not specifically disclosed in a prior art reference, the U. S. Patent and Trademark Office "possessed the authority to require the applicant to prove that the subject matter shown in the prior art does not possess the characteristics relied on." In re Ludtke and Sloan, 169 USPQ 563,566 (C.C.P.A. 1971). The applicant is required to prove that the subject matter shown would not operate as claimed.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3616

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
